FOREWORD

These Transactions constitute a record of the presentations at the National Convention. They have not been subjected to review by the Editorial Board of the Society. The timetable for planning our conventions precludes this at the present time. After the Convention, the papers will be reviewed by the Editorial Board and certain of them may appear in "Industrial Quality Control."

If you agree with the thoughts expressed on page VII, why not add your expression of appreciation by telling the authors how their papers have been of help to you. They would like to know.

Request for permission to reprint any portion of these Transactions should be addressed to Professor Mason E. Wescott, Chairman, Editorial Board, University College, Rutgers University, New Brunswick, New Jersey.

While these Transactions are copyrighted, the American Society for Quality Control assumes no responsibility for any of the authors' statements. Responsibility for the content of each paper resides with its author.

Edward M. Schrock
National Transactions Chairman
General Convention Committee

A TRIBUTE TO OUR AUTHORS

We all tend to take for granted some of the finest aspects of our human experience. One that affects us each year at this time is our National Convention Transactions. True we pay a small purchase price for the volume, but this is only to cover the costs of publication and distribution. Our authors are not paid.

Preparation of their manuscripts for publication is no simple task for our speakers. They are busy people. Some have limited stenographic services available. Some become sick just when they had planned to prepare their manuscripts. Some are given new or special jobs that greatly increase their responsibilities and work load. Some change companies while preparing their manuscripts. And in addition we give them a lot of detailed rules to follow in preparing their papers - rules which sometimes on the surface must appear unimportant and burdensome.

Why do our authors go to so much trouble to prepare manuscripts for us? There are probably as many different reasons as there are authors. Some of them, of course, will be concerned with the individual's desire to improve his professional status in the quality control field. But in every case there is a generous amount of self-sacrifice and desire to help others work more effectively in dealing with their quality control quality problems.

So our hat is off to our authors. You are a grand group of people.

ELEVEN YEAR INDEX TO NATIONAL CONVENTION TRANSACTIONS: 1947 - 1957

The numbers following the years are the pages upon which the papers indexed begin. For example, there are two papers in the Transactions for 1947 that are about Administrative Applications, and they start on pages 111 and 193.

There was no publication in 1948. The 1949 publication consisted of abstracts. In 1950 there were ten papers separately bound and numbered from one to ten. The listings for that year are therefore the number of the paper. The listings for other years are all page numbers.
